

JULY 2023

Euroscope Securities

BACKGROUND

Euroscope Securities is a prominent security services provider. They operate from Adlington Business Park. Due to their location being a busy business park, a robust soundproofing solution was needed. The presence of nearby light industrial facilities generated significant noise pollution, threatening the quiet atmosphere, essential for their operations.

WHAT WAS NEEDED

To address the noise pollution, it was crucial to implement a soundproofing solution that effectively reduced noise levels around the perimeter of the business park. The solution had to be efficient and sustainable while allowing for easy maintenance and access without compromising its effectiveness.

JULY 2023

WHAT WE DID

We were contracted in July 2023 to devise and implement the soundproofing solution. After thorough consultations with Euroscape Securities, the decision was made to install the JCW Reflective Sound Screen. The task involved supplying and installing 150 meters of 3-meter high JCW Reflective Sound Screen around the perimeter of the light industrial facility adjacent to the business park.

The installation process was planned and executed over two weeks by a team of three skilled professionals. The sound screen was anchored using durable timber posts, ensuring stability and longevity.

THE RESULT

The project was completed efficiently within the two-week timeframe in July 2023. The JCW Reflective Sound Screen successfully mitigated the noise pollution from the nearby industrial activities, significantly improving the working environment for Euroscape Securities.
